BATTLE GAMES FOR BOYS

The Big Battle Game

The Most Absorbing of all Soldier Games for Boys

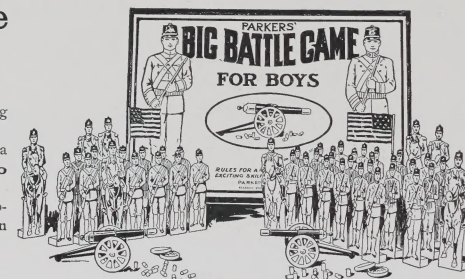

No. 10

Over twenty years ago we originated the first big battle game of this class.

This is a floor or table game, not merely a toy, in which a battle is fought between two contesting armies.

The soldiers are made of fine, strong, non-warping stock, brilliant in color, the war being between the "reds" and the "blues."

Both armies are provided with cannon.

Rules for the game are plainly written and the interest of the players in this game is ten times that of the ordinary popping over of soldiers, the Big Battle Game being more realistic than any other article of the kind.

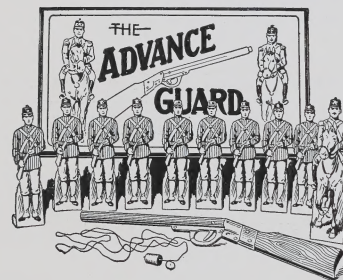

The game contains two armies of soldiers and eight mounted officers, two cannon, shells, etc.

Size of box, $21\frac{1}{2} \times 14\frac{1}{2}$.

Price, \$1.50

MAXFIELD PARRISH SOLDIER

No. 5.

This stalwart soldier was painted by Maxfield Parrish especially for this game, with all his quaintness of style, droll humor and depth of color. The soldier is strongly mounted and stands two feet high. The head nods when a shot from the air gun (which he carries and which you may boldly take away from him) hits him fairly and squarely.

This is a charming and artistic game and is probably the first toy elaborately designed by an artist of international fame.

Price, \$1.00.

If they do not land in the holes they come down again and are again driven up by the whirling top. Again and again this happens until most of the balls are landed in the holes, accomplishing a count for the player.

Box Ball consists of a well made cage of hardwood, well finished and varnished, with five balls. The cage is divided into compartments with swinging pendants of hardwood, which have a tendency to kick back the ball rolled against them. It should be played upon a dining room table, each player rolling the five balls, in turn, the full length of the table, in hopes that one may strike one of the pendants which guards a compartment, and, by swinging it back, pass under it.

At the further end of the compartment is another swinging pendant, and if a ball is rolled too hard down, it will not only roll into the compartment, but force back the pendant in the other end and pass out, for which there is a penalty. The game is a very pretty one and is entirely original.

MADCAP

No. 553.

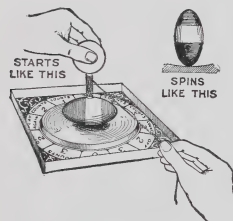

Absolutely Novel

The Madcap game contains a simple, original principle in games. The

"Madcap" is a tall strong cone, attached by a cord to the centre of the wood frame box on which it stands. At this cone are thrown discs of solid rubber, which come with the game. Now, ordinarily, if one were to strike a cone, it would fall from him, but on account of the simple attachment, no one can tell in what direction this cone will fall. Sometimes it will fall towards you, at other times sideways, and wherever it falls, it points to a numbered space which gives the player his score. An absolute novelty, quite distinct from all other throwing games.

Size of box 11x11.
